## Pro Airbrush Makeup Course

The objective of the course is to teach a conventional makeup artist how to use an airbrush makeup equipment for professional application in a multitude of settings such as beauty, bridal, fashion, glamour, and body airbrush, among others. This is an advanced makeup course and requires a thorough understanding and experience in conventional makeup to get the most from this program.

The course covers:

- a. History of airbrush makeup.
- b. Different types of airbrush equipment. Consumer vs. Pro Airbrush equipment.
- c. Different types of airbrush foundations and their different applications.
- d. Practice application on paper - dots, lines, spirals, circles, blending/gradation, and 3D airbrushing.
- e. Stencil design and preparation. Practical application of stencils.
- f. Body airbrush and its application.
- g. Bridal and fashion airbrush theory and actual application
- h. Practice application on two models: male model for body airbrush and avant garde/fashion, a female model for bridal.
- i. Concealing and color correction in airbrush.
- j. Professional photoshoot on 4 models with two looks for each model or a total of 8 looks.
- k. Equipment maintenance and troubleshooting including complete disassembly and assembly of airbrush gun. You will learn the symptoms of different problems and how to solve them.

During the course, you will work on a total of 6 different live models. This allows you more than enough practice to be proficient and at the same time, build your professional airbrush makeup portfolio. Another significant benefit of a photoshoot is it allows you and your instructors to review and assess your work not just visually, but photographically as well.

The class runs for 4 meetings with a minimum of 8 hours per meeting (but could run up to 12 depending on the progress of the individual student). Total hours is a minimum of 32 and could run up to about 50 hours, in most cases.

It is taught by Hollywood-trained hair & makeup artists/instructors. This is the most comprehensive and intense airbrush makeup course in the country.
